EDUCATION

The Ohio State University

Columbus, OH

B.S. in Computer Science and Engineering

May 2027

Relevant Courses: Artificial Intelligence, Natural Language Processing, Neural Networks

WORK EXPERIENCE

JPMorgan Chase | Software Engineer Intern | Columbus, OH

June 2026 - Present

- Enabled biweekly deployment of 100+ data enrichment rules to prod across a process executed ~16,000,000 times/day
- Built a Cassandra backend for an internal tool saving DevOps team 10hrs/wk, enabling analysts to test enrichment rules
- Earned a full-time SWE return offer and a 2026-27 Academic Year Intern extension for summer internship performance

Ohio State Systems & AI Lab | Research Assistant II | Columbus, OH

Sept 2025 - Present

- Contributing to a workshop paper on weakly supervised corn residue segmentation using DeepLabV3+ & DINOv3
- Mentored 19 high school students with no prior CS background over 4 months, to create a DINOv3-based classifiers
- Curated 50+ datasets and fine-tuned Vision Transformer models (YOLOv11, DINOv3) for real-time Object Detection

Air Force Research Laboratory | Software Engineer Intern | Dayton, OH

May 2023 - August 2025

- Applied machine learning regression models on 10+ datasets to optimize flight scheduling for C-130 pilots by 10%
- Developed a MicroPython RESTful API integrated with the ARES OS .NET/C# backend to control microcontrollers
- Built a 2+ player mobile app using Unreal Engine with custom state management and real-time computer networking

Ohio State Wexner Medical Center | Research Assistant | Columbus, OH

Aug 2024 - May 2025

- Implemented a Deep Learning model analyzing 120,000+ CGM data points/participant to predict glucose intake timing
- Developed a Flutter-based mobile health app with secure biometric data logging via Apple Health Kit and SQLite

PROJECTS

RankTheRivalry.com | Personal Project | [Live Demo](#)

April 2026

Tech Stack: AWS CDK, CloudFront, API Gateway, Lambda (Python), DynamoDB, Cloudflare Turnstile, React.js, Selenium

- Reached 8,600+ unique users, 252k+ post impressions, and 205k+ votes, growing into a national college rivalry platform
- Architected a serverless AWS stack (CloudFront, API Gateway, Lambda, DynamoDB) with sub-200ms P50 latency
- Designed anti-bot defenses with Cloudflare Turnstile, HMAC-SHA256 payload obfuscation, and server-validated pairs
- Built a weighted Elo-based pairing engine with 4 algorithmic flavors and exposure-debt balancing across 250+ pairs

Pathfindr | JPMC CodeForGood Hackathon | [Live Demo](#)

November 2025

Tech Stack: Supabase, Flask, React.js, TypeScript, Leaflet, Geoapify, Framer Motion, Postman

- Selected as 1 of 200 participants from 12,000+ applicants to build a real-world product for the nonprofit ModernStates

LEADERSHIP EXPERIENCE

Lead Programmer | Terrestrial Robotics Club | [GitHub](#)

August 2025 - Present

- Developing an autonomous vision pipeline for a Mars rover using YOLOv8 on Jetson Orin to enhance object detection

Chief Technology Officer/Founding Member | Lanarchy Club ([Official Website](#))

August 2024 - Present

- Designed and deployed thelanarchy.org using React.js and Bootstrap, enabling 340+ new members to join the club

TECHNICAL SKILLS

Languages: Python, Java, C, C#, JavaScript, Dart, HTML/CSS, SQL, CQL, Assembly

Frameworks & Libraries: React.js, Flutter, Flask, PyTorch, YOLOv8, OpenCV, Tailwind, Unreal, Unity

Tools & Platforms: AWS CDK, Git/GitHub, Android Studio, VS Code, Raspberry Pi, Jetson Orin, Pi Pico

Concepts: Machine Learning, Deep Learning, Distributed Systems, Computer Vision, API Development, Game Design
