EDUCATION

The Ohio State University – Main Campus | Columbus, OH

B.S. in Computer Science and Engineering | Minors: Biomedical Engineering

May 2027

Relevant Courses: Computer Networking, Artificial Intelligence, Database Systems, Computer Organization and Assembly Language, Data Structures and Algorithms, Object-Oriented Programming, Discrete Structures, Linear Algebra

WORK EXPERIENCE

JP Morgan Chase | Software Engineer Intern | Columbus, OH

Incoming Summer 2026

Ohio State Systems & AI Lab | Undergraduate Research Assistant | Columbus, OH

Sept 2025 - Present

- Mentored 11 high school students with no prior CS background over 4 months, to create a DINOv2-based classifiers
- Curated 20+ datasets and fine-tuned Visual Transformer models (YOLOv11, DINOv3) for real-time Object Detection

Air Force Research Laboratory | Software Engineer Intern | Dayton, OH | [GitHub](#) Summer 2023 - Summer 2025

- Developed a MicroPython RESTful API integrated with the ARES OS .NET/C# backend to control microcontrollers
- Built a +2 player mobile app using Unreal Engine with custom state management and real-time computer networking
- Applied machine learning regression models on 10+ datasets to optimize flight scheduling for C-130 pilots by 10%

Ohio State Wexner Medical Center | Undergraduate Research Assistant | Columbus, OH Aug 2024 - May 2025

- Implemented an LSTM Deep Learning model analyzing 120,000+ CGM data points per participant with 0.0033 MSE
- Developed a Flutter-based mobile health app with secure biometric data logging via Apple Health Kit and SQLite

PROJECTS

RankTheRivalry.com | Personal Project | [Live Demo](#)

November 2025

Tech Stack: AWS CDK, CloudFront, API Gateway, Lambda (Python), DynamoDB, Cloudflare Turnstile, React.js, Selenium

- Reached +214k post impressions, 6,200+ unique users, +105k votes, growing the project into a national rivalry platform
- Architected and deployed a secure full-stack AWS platform using CloudFront, API Gateway, Lambda, and DynamoDB
- Implemented robust backend security, including Cloudflare Turnstile, custom origin-verify headers, and rate limiting
- Built a Selenium-based LinkedIn scraping + LLM data-cleaning pipeline with automated ingestion into DynamoDB

Pathfindr | JPMC CodeForGood Hackathon | [Live Demo](#)

November 2025

Tech Stack: Supabase, Flask, React.js, Typescript, Leaflet, Geoapify, FramerMotion, Postman

- Selected as 1 of 200 participants from 12,000+ applicants to build a real-world product for the nonprofit ModernStates

Look2Type | Hack/AI 8 Project | [Live Demo](#)

July 2025

Tech Stack: Yolo v8, PyTorch, JavaScript, CSS, HTML, Scikit-learn, NumPy

- Achieved 60% real-time gaze-based typing accuracy by developing a virtual YOLOv8-powered eye-tracking keyboard
- Preprocessed and annotated 1500+ images to train a PyTorch-based gaze prediction model in real-time gaze typing

LEADERSHIP EXPERIENCE

Lead Programmer | Terrestrial Robotics Club | [GitHub](#)

August 2025 - Present

- Developing an autonomous vision pipeline for a Mars Rover using YOLOv8 on Jetson Orin to enhance object detection

Chief Technology Officer/Founding Member | Lanarchy Club ([Official Website](#))

August 2024 - Present

- Designed and deployed thelanarchy.org using React.js and Bootstrap, enabling 330+ new members to join the club
- Engineered a Google Cloud bot leveraging Discord REST API and Google Sheets API to track club member statistics

TECHNICAL SKILLS

Languages: Python, Java, C, C#, JavaScript, Dart, HTML/CSS, SQL, Assembly

Frameworks & Libraries: React.js, Flutter, Flask, PyTorch, YOLOv8, OpenCV, Tailwind, Unreal, Unity

Tools & Platforms: AWS CDK, Git/GitHub, Android Studio, VS Code, Raspberry Pi, Jetson Orin, Pi Pico

Concepts: Machine Learning, Deep Learning, Distributed Systems, Computer Vision, API Development, Game Design
